Special Announcement

Editing this Journal is very much a communal enterprise. Each number of the Journal carries on its cover the names of the gifted, conscientious Consulting Editors whose generous contributions of talent, time, and energy are of inestimable value to the Action Editors in arriving at editorial decisions and to the authors in revising their manuscripts or even their research strategies so as to contribute more effectively to the science of psychology. Aside from the gratitude of the Action Editors and many of the authors, the only rewards the Consulting Editors receive for their contribution to scientific communication and the postdoctoral training of some of the contributing authors are their own personal satisfaction in doing a splendid job, a complimentary subscription to the Journal, and such prestige and other consequences that flow from having their names listed on the cover in what is obviously very good company.

Each year a large number of manuscripts are referred to reviewers who are not among those listed on the masthead. These unlisted reviewers possess the same admirable characteristics as the regular Consulting Editors, and they give us the same kind of thorough and competent reviews as do the latter. The unlisted reviewers receive no tangible rewards for their contributions; their names do not appear on the masthead; they receive no complimentary subscription. They deserve more recognition. Over fifty of the manuscripts received during 1970 were reviewed by over forty-six such unlisted reviewers.

Some of these reviewers have joined the regulars, so that their names grace the 1971 mastheads. Most of them, however, did not, and we take this opportunity to recognize more explicitly their contributions to the authors and editors of the Journal by listing their names below:
